Reason for allowance

The following is an examiner's statement of reasons for allowance: in view of the amendment filed on 12-22-05, the prior art reference of records (US Pat. 6,118,326) fails to teach or fairly suggest a transmission gate comprising a constant voltage difference circuit including a plurality of transistors wherein the constant voltage difference circuit is arranged such that the substantially constant voltage difference is substantially equal to the sum of the gate-to-source voltages of each of the plurality of transistors as called for in claims 23, 28, 34 and 45; a transmission gate comprising a boost circuit and a current source comprising a current mirror as called for in claims 25 and 44; a circuit for multiplexing comprising first and second transmission gates as called for in claim 35; a boost circuit that generates a boost voltage which is greater than the supply voltage as called for in claim 43; a method for multiplexing, comprising: providing the control input signal to a control input of the switch circuit, wherein maintaining the substantially constant voltage difference between the control input voltage and the input voltage is not accomplished via capacitive sampling as called for in claim 46; a method for multiplexing, comprising responsive to the bias current, providing a control input signal such that a voltage difference between the control input voltage and the input voltage is substantially constant as called for in claim 47. Therefore, claims 23, 25-32, 34-37, 41 and 43-47 are presently allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
